

How to Disable Driver Signature Verification on 64-Bit Windows 10

Simply select Restart from the power options menu (on Windows 8 that's under Charms or on the login screen, and in Windows 10 it's on the Start Menu).

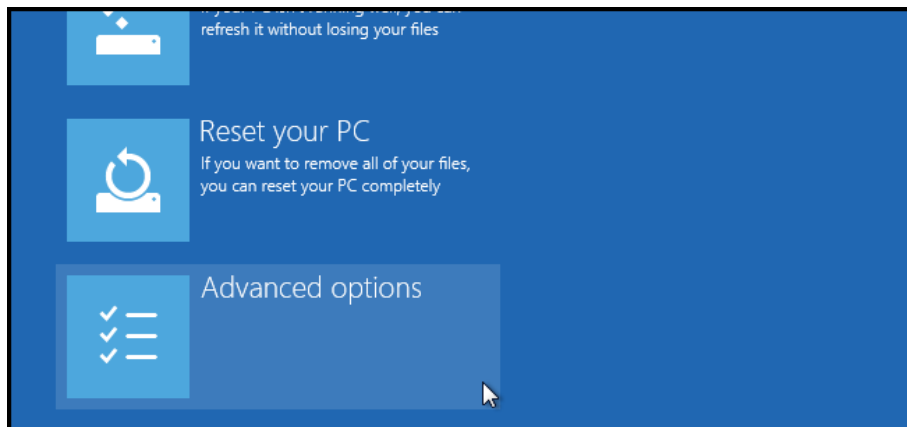

Hold down the SHIFT key while you click Restart.

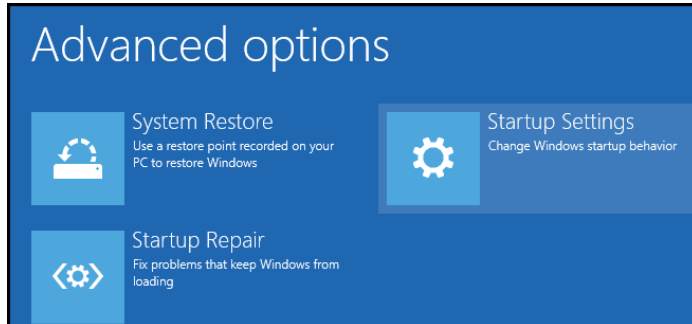

Once your computer has rebooted you will be able to choose the Troubleshoot option.

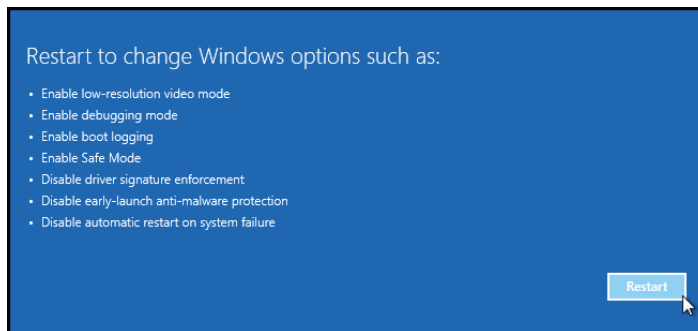

Then head into Advanced options.

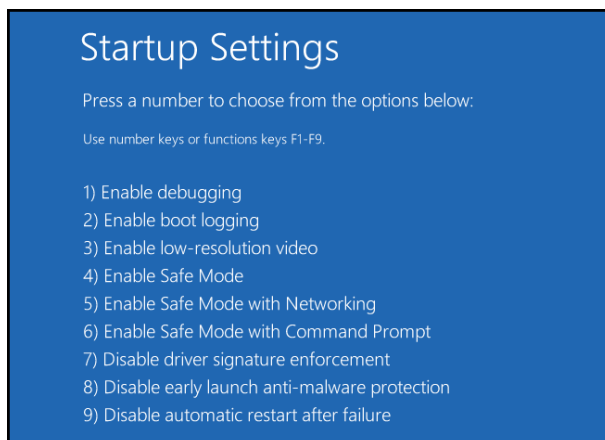

Then Startup Settings.

Since we are modifying boot time configuration settings, you will need to restart your Computer one last time.

Finally, you will be given a list of startup settings that you can change. The one we are looking for is "Disable driver signature enforcement". To choose the setting, you will need to press the F7 key.

That's all there is to it. Your PC will then reboot and you will be able to install unsigned drivers without any error message 😊
